Battery Metals: Cashed-up Liontown reveals aggressive Kathleen Valley development schedule

There aren't many explorers capable of raising \$18m right now, but **Liontown (ASX:LTR)** is having a hell of a year.

As lithium prices circle the drain, **the WA small cap darling has consistently defied market sentiment.**

The stock is still up 331 per cent since the start of 2019.

This giant, octopus-looking feeder zone remains open both along strike and at depth.

Liontown has intersected it over a +600m strike length as part of larger high-grade mineralised system which has now been defined over a strike length of +1km.

Drilling will take two to three months to complete, Liontown says.
